

SCC Soft Computer – The Largest Laboratory Information Systems Vendor in the World

Founded in 1979 by Gilbert Hakim, SCC Soft Computer is the world's largest LIS programming house—with a global workforce of more

than 1,800 information technology, medical technology, communications, and business professionals dedicated to LIS development. Mr. Hakim's passion for healthcare IT, and the dedication of his diverse workforce, have made SCC Soft Computer the leader in laboratory and genetics information management system software development.

SCC Soft Computer has been producing laboratory and genetics information management systems for more than three decades. As the largest developer of LIS solutions in the world, SCC Soft Computer provides one of the most complete solution sets of LIS software with full suites of laboratory and genetics information management system solutions. These tools enable healthcare clients to develop integrated laboratory environments across different departments that allow their technical environments to grow as their laboratory needs expand.

These integrated solutions are helping the largest and most sophisticated hospitals, IDNs (integrated delivery networks), and laboratories—including many of the world's renowned academic medical institutions—reach peak productivity.

SCC Soft Computer designs, develops, and delivers healthcare IT.
